

Dr Kalidas is an awesome doctor.

I have been seeing dr k for about a little over a year...I have EBV and Lyme.

I just love him, Amy his nurse and the girls at the IV room, Paula, synthia, and Karla! Everyone is so helpful, thoughtful and sympathetic. I am so excited to share how special doctor Kalidas is. He listens when you talk and he will ask questions, he explains everything, he even suggest to record the visits so I could go back and listen, which I love because I get so overwhelm and sometimes can't remember everything discussed, he truly cares. ❤️

Recently I was diagnosed with an inoperable detached retina. I called Dr. K and told him if he could help me . He immediately researched and called me back. He suggested we try two different IV's.... twice a week. the day after the first IV my eye was feeling better. I was more cleared minded and I had more energy. 😊 but yes on the road to recovery..... I am so blessed to be treated by doctor Kalidas! I am feeling better all the way around!
